Add Eye-Catching Color to Your Reception

bigger and better?

For brides who want to venture beyond makeup tricks, there are more extreme measures to be taken. NYC facial plastic surgeon Michelle R. Yagoda, M.D., treats age-related under-eye puffiness—a notorious eye shrinker—with Restylane, an injectable filler. “If you fill in the depressions or flat spots below a puffy area, it creates the illusion of a more open eye.” Miami and NYC dermatologist Frederic Brandt, M.D., is a master of the “Botox eye-lift,” a few expertly placed injections that lift the brow and subtly open the eye. To add a gentle boost to the lips, both doctors rely on hyaluronic acid-based fillers like Restylane and Juvéderm for a natural-looking plumping effect. The results last from four to six months.
