THE OLD SIMON!

DID SIMON RUIN HIS FACE?

He just dropped 20 pounds on a vegan diet, and Simon Cowell's dramatic new look had everyone talking when he showed up to a July 4 party in London. "He was completely unrecognizable!" says a source. "Fans were commenting about his 'weird' face." According to an expert, Simon, 59, seems to have gotten some more plastic surgery to complement his newly svelte figure. (Simon's rep denies the star had plastic surgery recently.) "His face looks a bit more distorted than just weight loss," NYC plastic surgeon Dr. Michelle Yagoda, who has not treated him, tells *In Touch*. The *America's Got Talent* judge has previously admitted to getting a face-lift, Botox and fillers. "It's no secret that he's vain," says the source, "and even though he's actually happy about his appearance right now, some friends think he's finally gone too far."
