F IAN SOMERHALDER

QUIZ ANSWERS: 1.F, 2.B, 3.D, 4.C, 5.E, 6.A

J. Lo's
JUGGLING ACT

Jennifer Lopez's love might not cost a thing, but her children, Max and Emme, seem to be the ones paying the price for her successful career. According to a source, the 50-year-old superstar splits her time between NYC, LA and Miami – where the 11-year-old twins currently go to school. "J. Lo is always working on something, and that's the way she likes it," the source admits. "However, the kids are getting to an age where they need and want their mom around." Emme, in particular, is said to have asked the *Hustlers* star to stop traveling so much. "Jennifer and Emme are super close. Everyone can see that she looks up to her mother," shares the source. "Deep down, J. Lo knows she needs to slow down. Those two coconuts mean the world to her."

► Jennifer's twins "want her to spend more time at home with them," reveals a source.

Did the Marvel star (seen here in 2009 and 2020) boost her confidence with cosmetic procedures?

Brie's

ABOUT-FACE

Plastic surgeons, assemble! A team of super-skilled docs is likely responsible for transforming Brie Larson's appearance before she ever put on the *Captain Marvel* suit, according to *Life & Style's* expert. "It looks like she had a rhinoplasty to narrow and define the tip and bridge of her nose, as well as an upper eye lift," surmises Dr. Michelle Yagoda, an NYC-based plastic surgeon who has not treated the *Avengers* star, 30. "Her jawline and cheeks have seemingly been augmented by filler, too, which has given her a more contoured appearance." While some A-listers go overboard with the injectables, the actress appears to have had the good sense to know when to stop. "Brie looks beautiful and natural," adds Dr. Yagoda. "She's a perfect example of how subtle changes can make a drastic difference."
